

This half Term, Year 2 will be learning...

English

Literature Works will be taught daily incorporating spelling, punctuation, grammar and spelling knowledge. The children will also take part in regular whole-class guided reading sessions as well as being heard to read individually. We will focus on a variety of narrative and non-fiction books that link to our topic, as well as poetry. Children will apply their writing skills through other subject areas within the topic.

Maths

Children will continue developing their skills in number, counting, partitioning and calculation. Taking a mastery approach, children will have a deeper understanding of numbers and their worth and be able to manipulate numbers appropriately to solve problems and calculations. They will develop mental strategies for addition, subtraction, multiplication and division. handling, measures, shape and number

Art

In Art children will explore colour, texture and pattern to create pictures of living things. We will focus on the artist David Hockney and his painting of landscapes.

Forest School

Children will learn to be independent, use their creativity and initiative and problem solve during forest school activities.

Science

During this topic children will be learning about living things and their habitats, animals including humans and plants. We will also be looking at where food comes from, how animals are cared for and about healthy diet and exercise.

Food and Farming Autumn 1 2020

Music

In music children will be taught to play rhythms and compose their own rhythms on tuned and untuned instruments as well as appreciating different kinds of music.

Computing

Children will be taught to use technology safely and respectfully and will begin to recognise the importance of keeping personal information private.

P.E

Children will be taught by specialist coaches for 1 lesson per week. The other lesson will be based on playing games to improve fitness and learn how to keep their body healthy.

Geography

In Geography the children will look at the landscapes around us and use basic Geographical vocabulary to refer to it. Through looking at maps and aerial photographs they will develop their Geographical skills and fieldwork.

R.E & PSHCE

In R.E. we will be learning about creation and what Christians believe about this area. In PSHCE we will be exploring new beginnings and settling into new classroom routines.
