

Countries of the World

Learning Objective:

To be able to identify the continents of the world.

NEXT

Do you know what a
continent is?

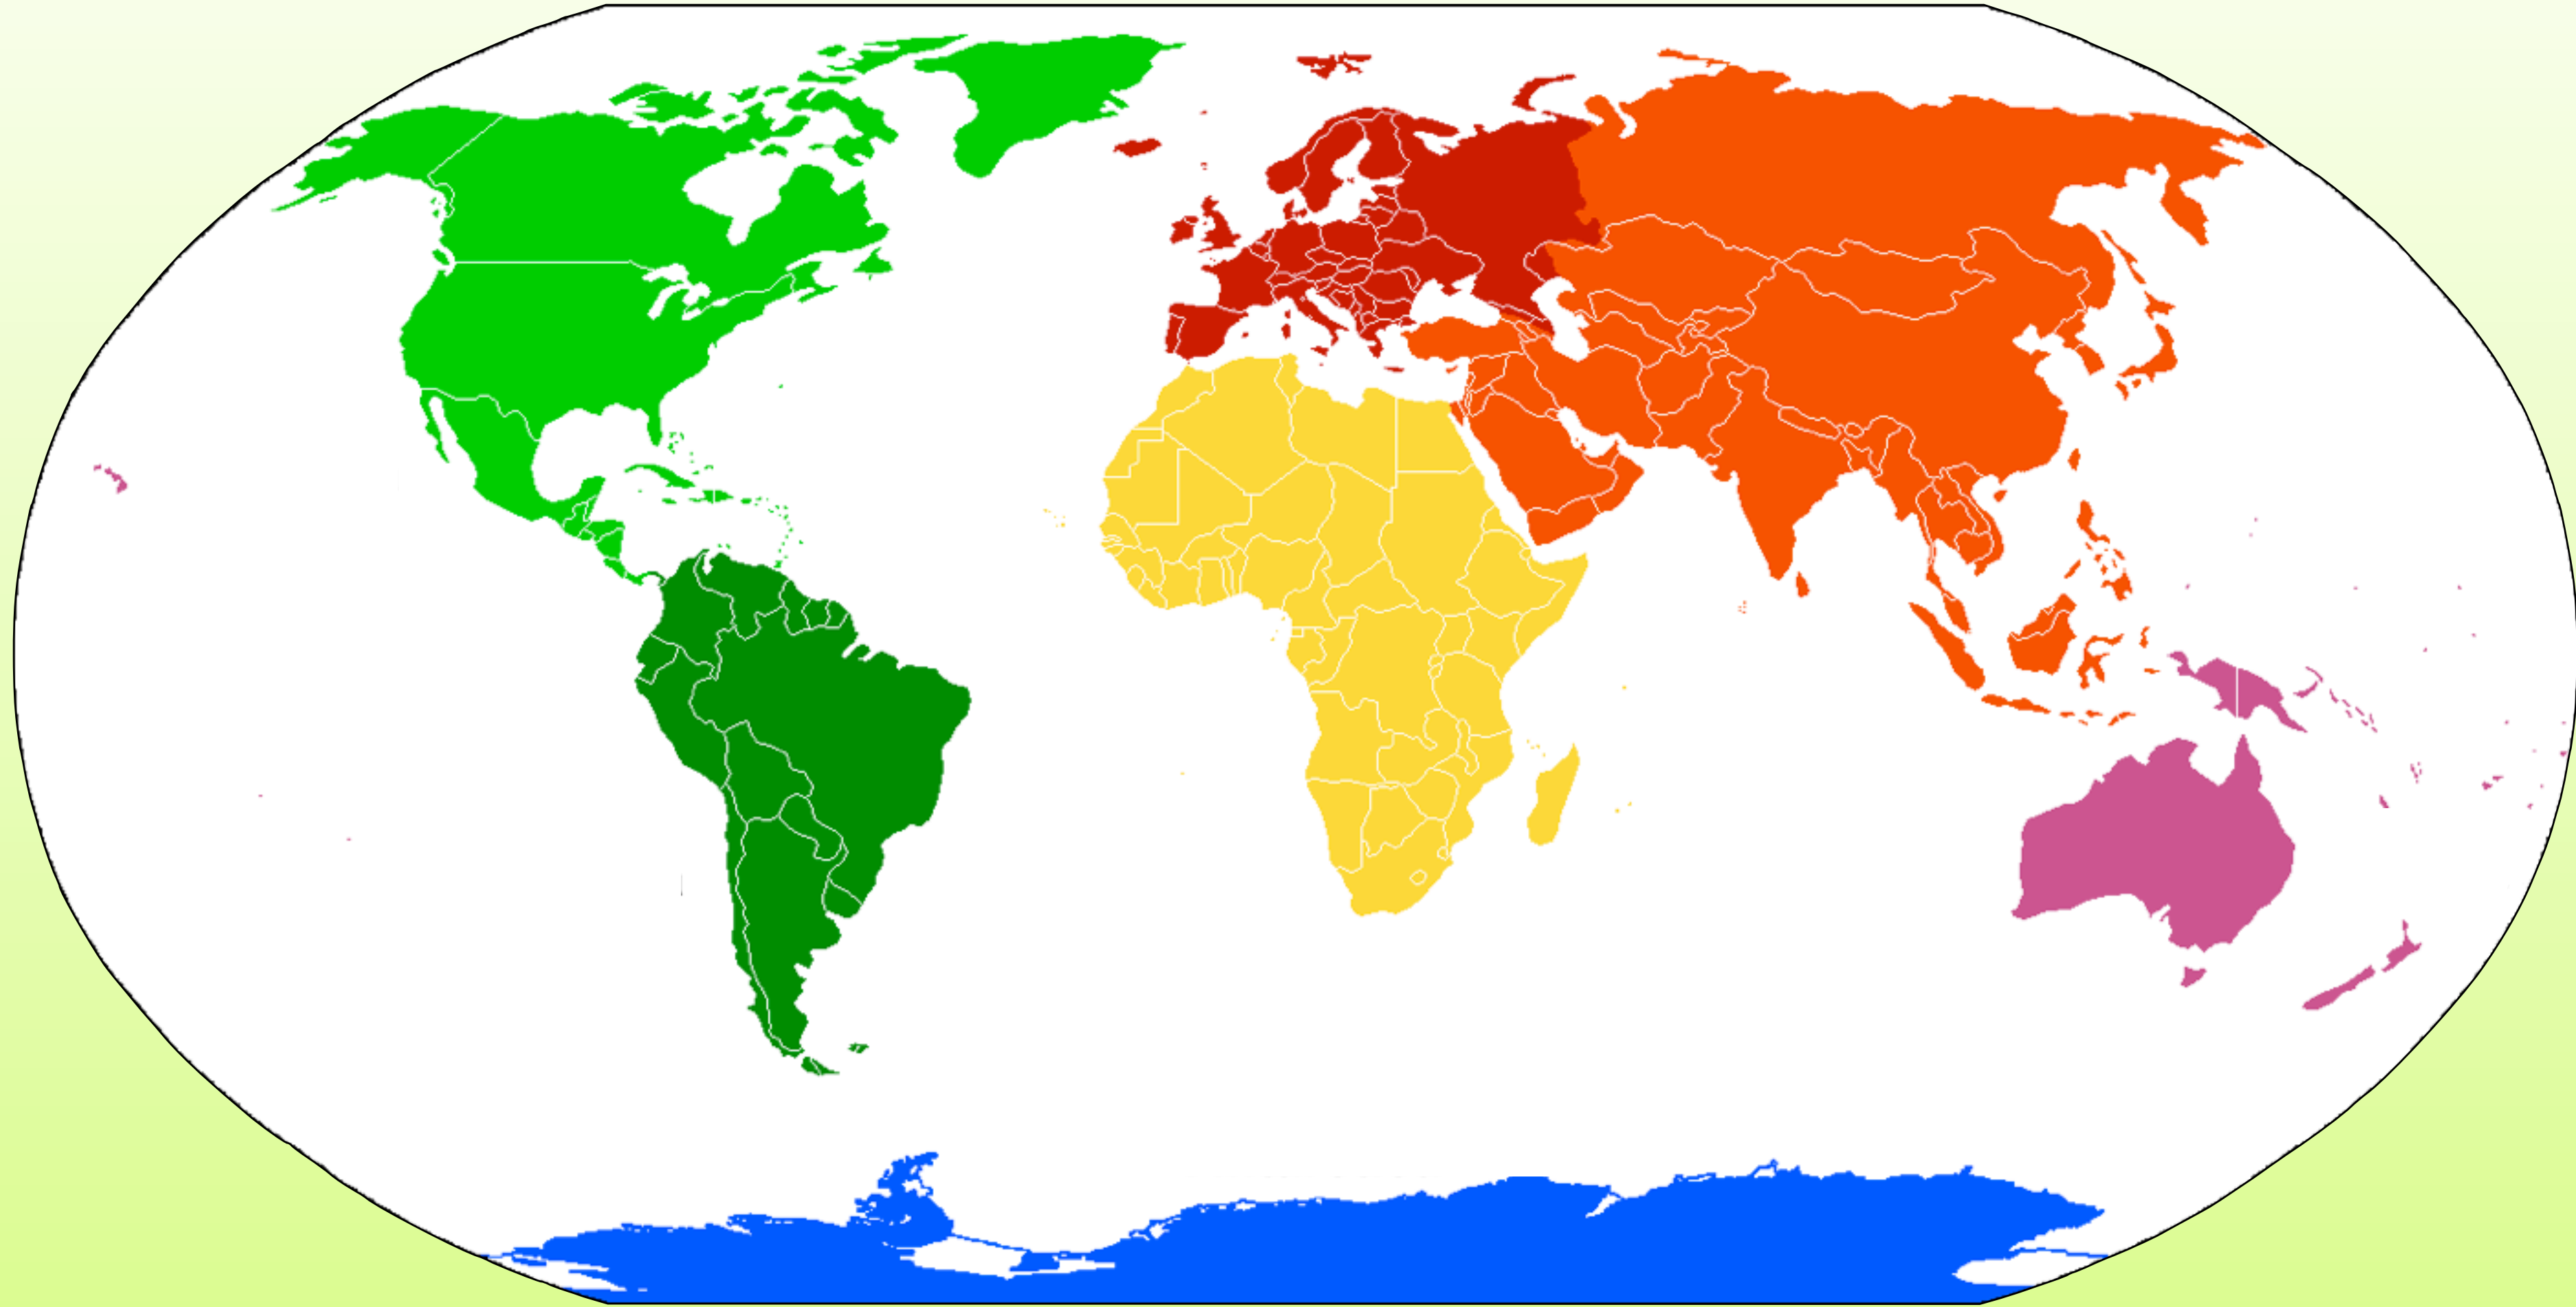

What is the difference
between a **continent** and a
country?

BACK

NEXT

A continent is a large land mass. Most people agree that there are 7 continents in the world.
A country is a region of land with its own government. Continents all have lots of different countries in.

Each of the colours on this map show a different continent. The white lines show the borders of countries.

What do you think the names of the 7 continents are? Write a list of your ideas.

Ideas...

BACK

NEXT

Here are the names of the 7 continents. Did you think of them all?

Europe

Asia

Africa

Australia

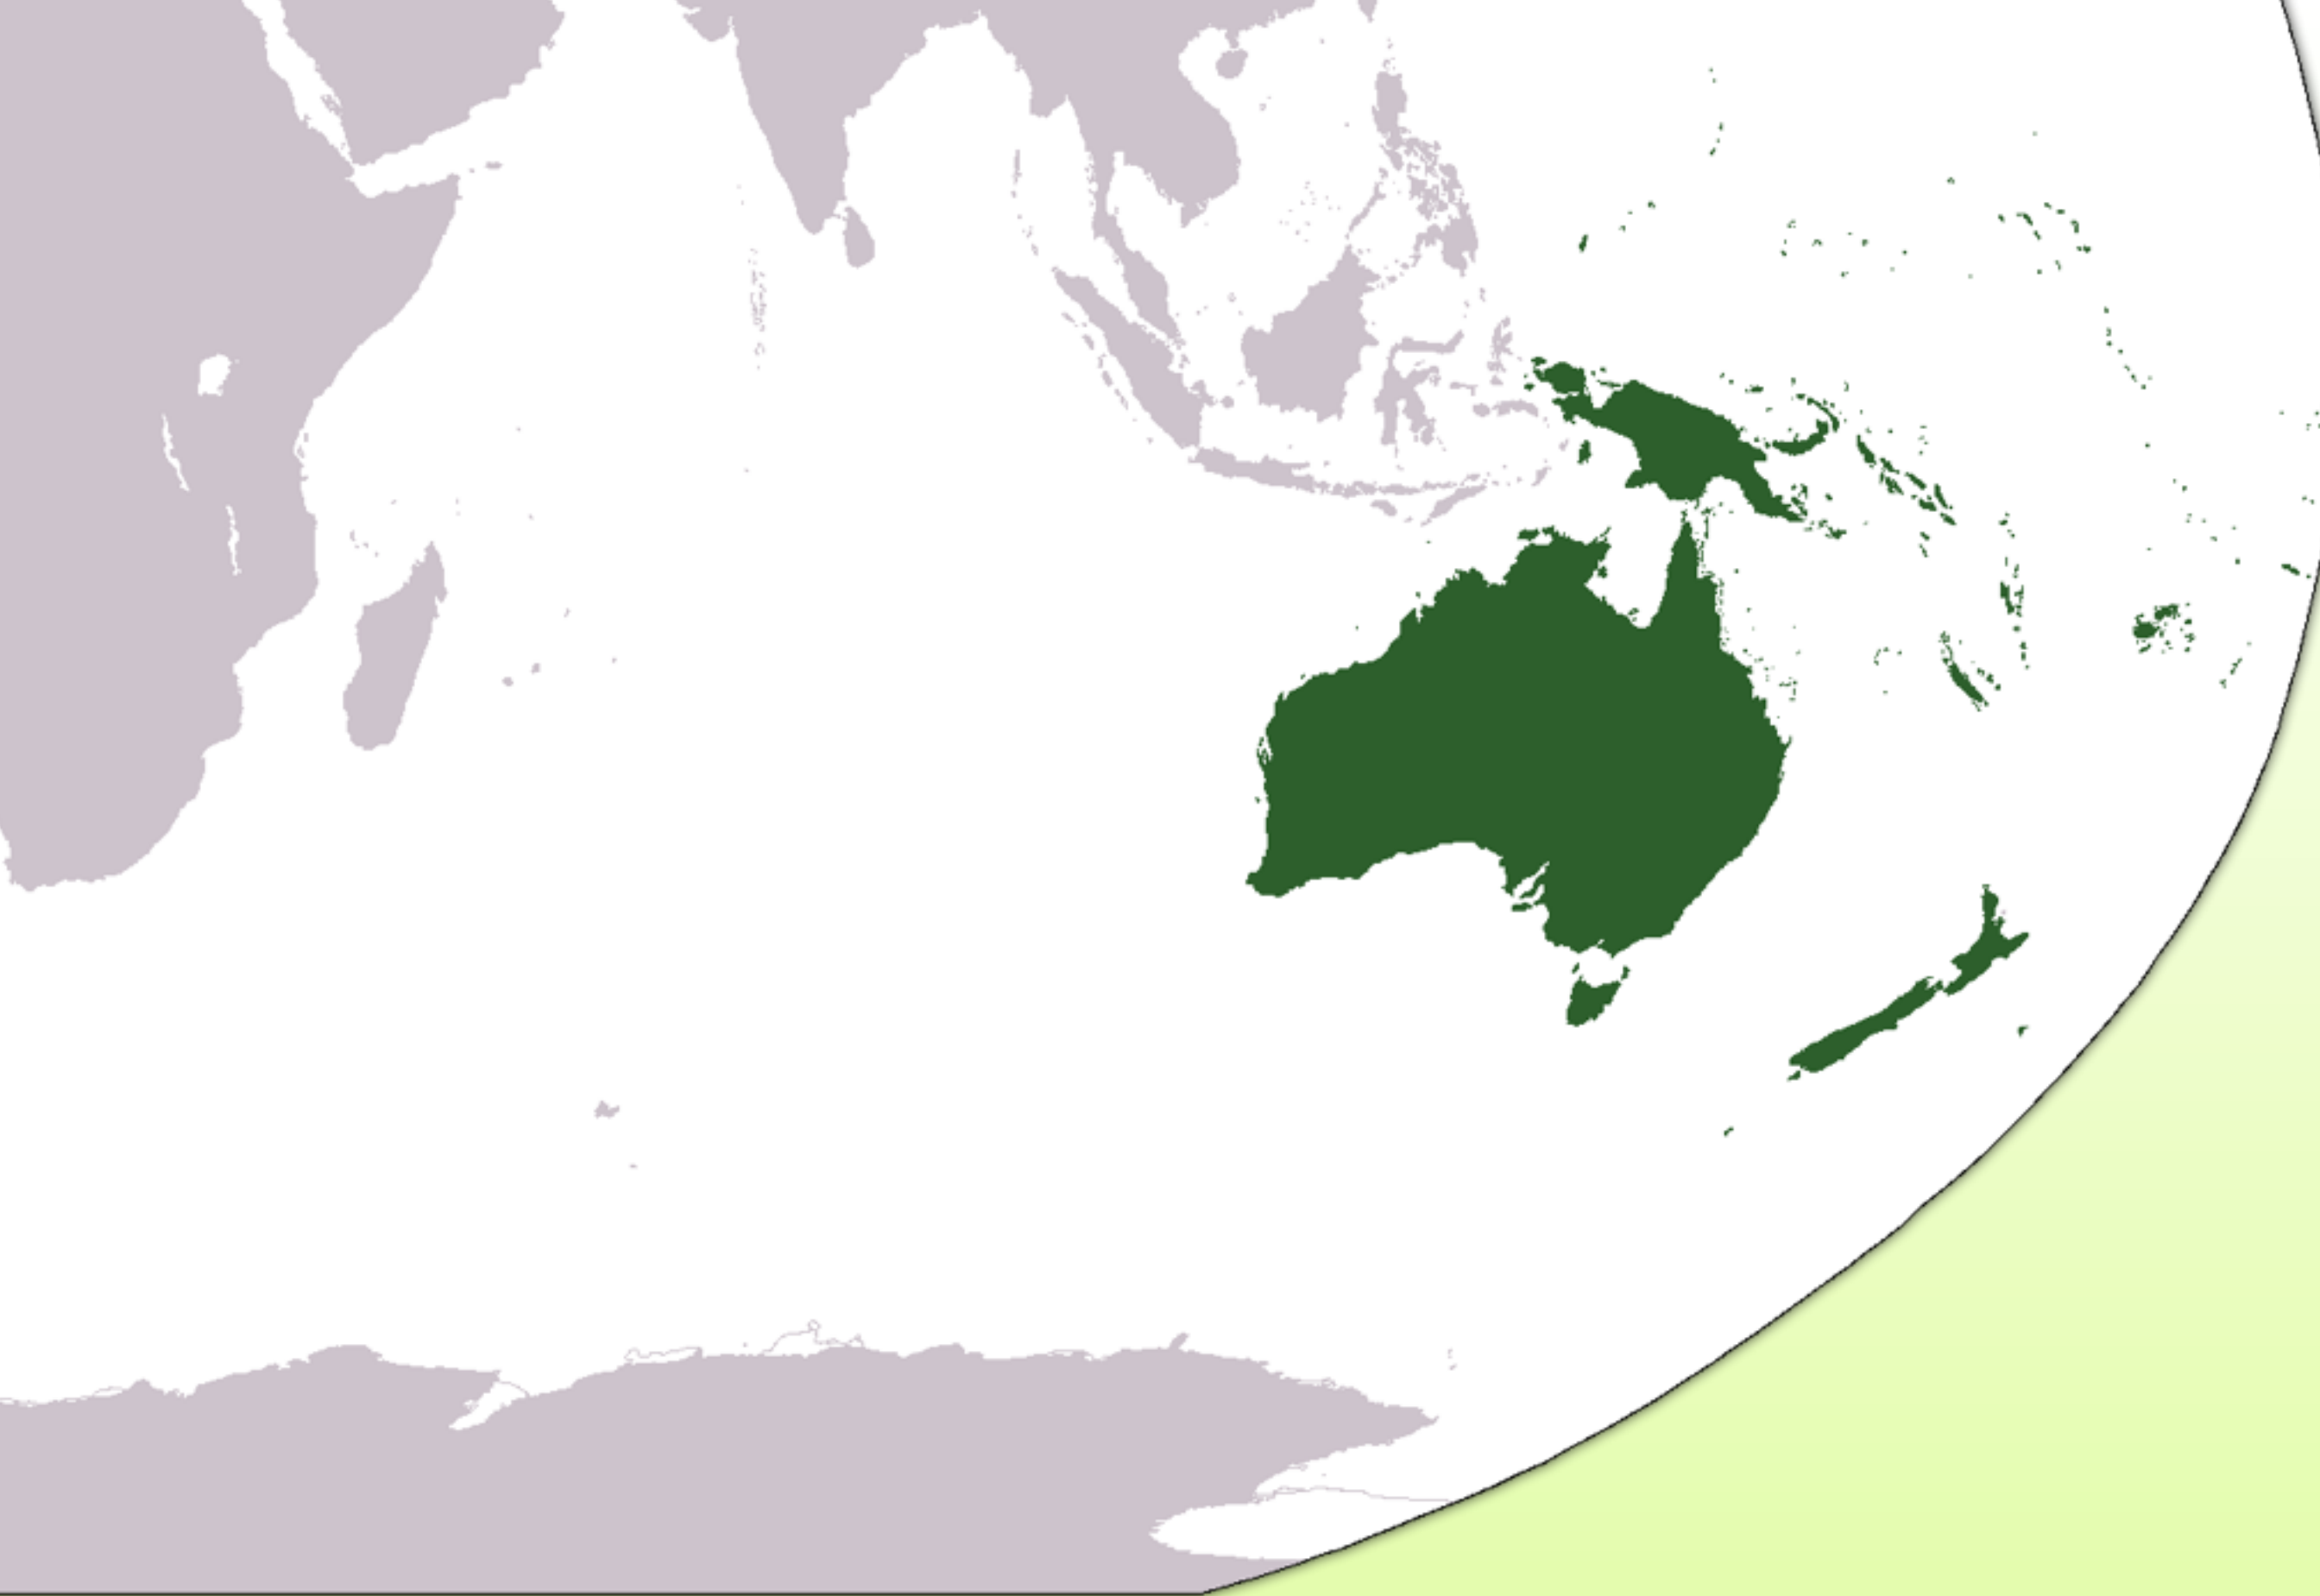

Antarctica

North America

South America

BACK

NEXT

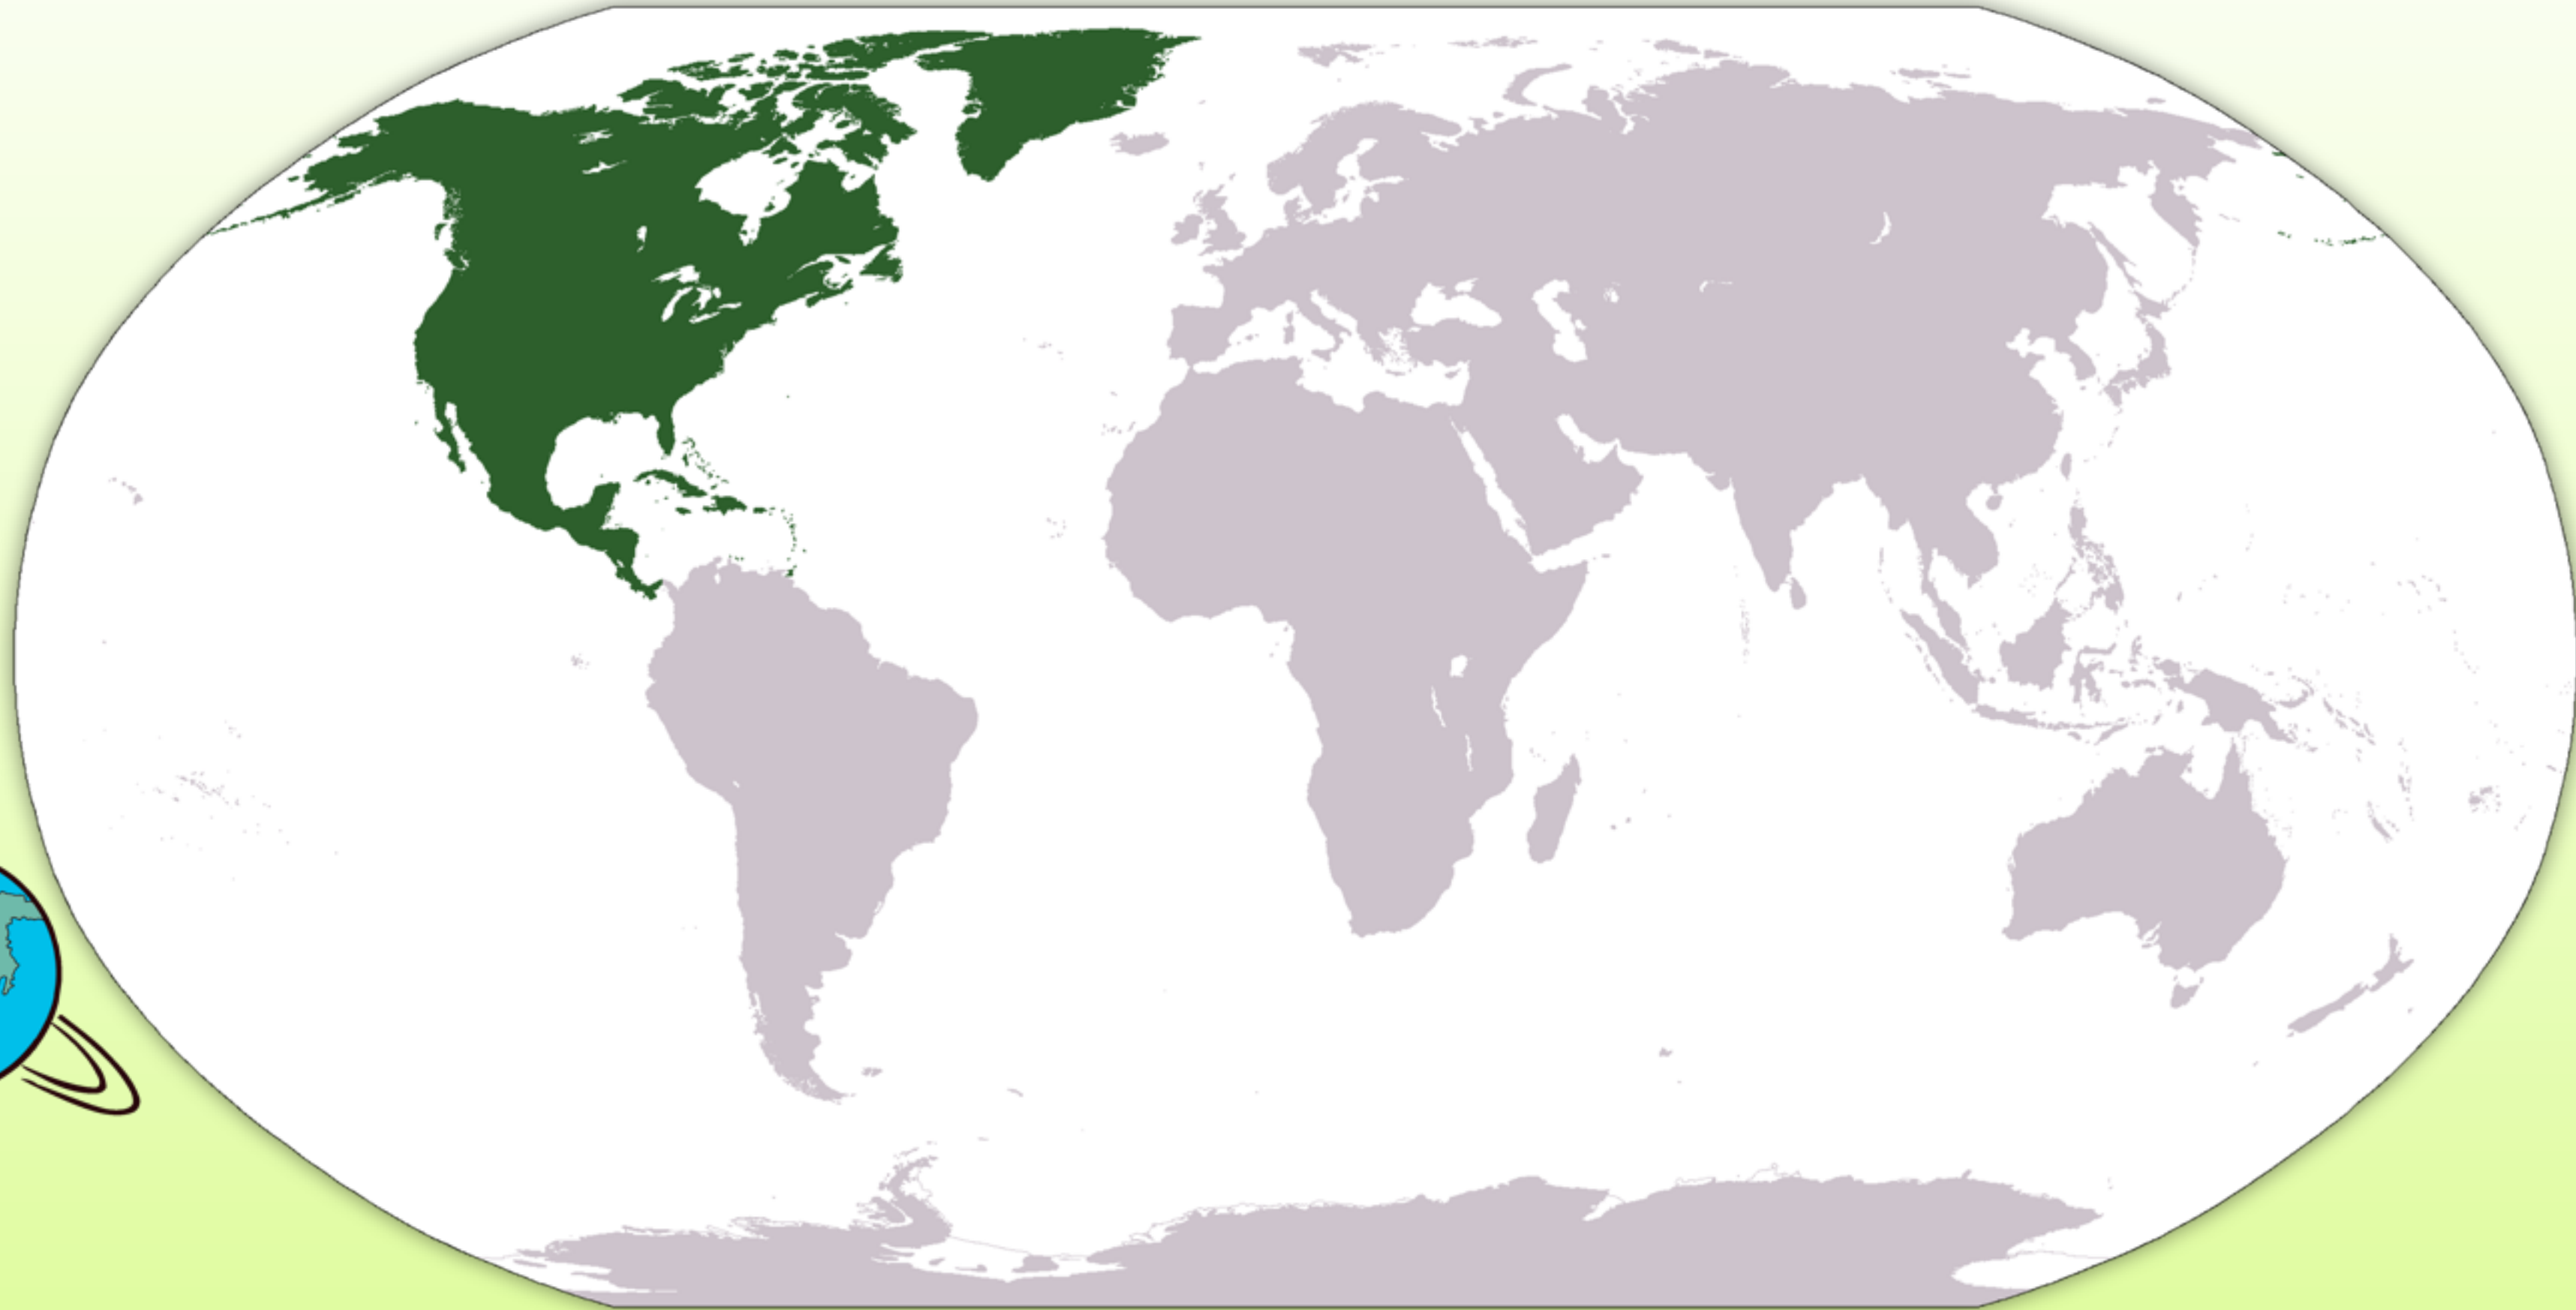

There is some confusion over the continent of Australia. Because the word 'continent' refers to a large mass of land, all the small islands around Australia are not technically part of the continent.

When splitting the countries of the world into the seven continents, these countries are part of the Australian continent. As a group of countries, this is sometimes called Australasia or Oceania.
